Technical Skills

- **Frontend:** React, TypeScript, JavaScript
- **Backend:** Python, Node.js, Express, REST APIs, WebSockets, SSE, ASP.NET, C#, GRPC
- **Cloud & DevOps:** Google Cloud, Microsoft Azure, Docker, Kubernetes, CI/CD pipelines, Azure DevOps, Oracle
- **Architecture:** Microservices, event-driven systems (Redis + BullMQ), modular API design, Docker and basic Kubernetes
- **AI & Data:** LLM integration, Agentic programming
- **Other:** Git, Agile/Scrum

Wyrażam zgodę na przetwarzanie moich danych osobowych dla potrzeb niezbędnych do realizacji procesu rekrutacji (zgodnie z ustawą z dnia 10 maja 2018 roku o ochronie danych osobowych (Dz. Ustaw z 2018, poz. 1000) oraz zgodnie z Rozporządzeniem Parlamentu Europejskiego i Rady (UE) 2016/679 z dnia 27 kwietnia 2016 r. w sprawie ochrony osób fizycznych w związku z przetwarzaniem danych osobowych i w sprawie swobodnego przepływu takich danych oraz uchylenia dyrektywy 95/46/WE (RODO).

Summary

Software engineer and SaaS architect with experience building and scaling distributed systems into production revenue-generating platforms.

I focus on distributed system design, event-driven architectures, and multi-tenant SaaS products, working across backend, infrastructure, and product ownership.

5+ years of professional experience building scalable SaaS platforms and enterprise applications using Node, ASP.NET or Python. Experienced in microservice architecture, cloud deployments (GCP/Azure), CI/CD automation, and AI-powered feature integration. Strong background in system design, production reliability, and cross-functional collaboration.

Work Experience

SEP 2024-
PRESENT

Lead Architect

Digitalink SRL (Italy)

- Architected and led development of an enterprise SaaS CRM platform designed for micro-agencies in partnership with a Milan-based marketing company.
- Owned the full product lifecycle from architecture and infrastructure to product strategy and cross-department collaboration with sales and business stakeholders.
- **KEY RESPONSIBILITIES**
- Designed and implemented an event-driven distributed microservices architecture
- Built scalable backend systems using TypeScript/Node.js ecosystem technologies
- Implemented CI/CD pipelines and managed VPS-based production infrastructure
- Developed multi-tenant SaaS architecture supporting thousands of active users
- Engineered high-volume CSV import systems with idempotency handling and fault tolerance
- Built real-time communication systems using WebSockets/socket-based infrastructure
- Collaborated directly with sales and leadership teams on product direction and feature prioritization
- Led technical product decisions balancing scalability, usability, and business goals
- Managed platform scalability, reliability, and long-term architectural planning
- **ACHIEVEMENTS**
- Contributed to growth reaching approximately 8,000 monthly active users
- Platform sold approximately 1,500 yearly licenses within the first year
- Supported generation of approximately €1M annual revenue for the parent company
- Maintained product scalability during rapid customer growth
- Company currently preparing for potential acquisition discussions targeted for 2027

MAR 2021
- JUL 2024

Senior Software & Machine Learning Engineer

Aries Tech (Italy)

- Built and modernized enterprise-grade applications using React and Node.js.
- Designed and deployed AI-driven modules (NLP systems, data extraction pipelines) integrated into REST APIs.

Languages

- Italian (Native)
- English (C2)
- Spanish (B2)
- Polish (A1), actively learning

More about me

- I approach software engineering as systems design rather than feature implementation. I am particularly interested in clean architecture, event-driven systems, and scalable frontend/backend interactions. Having built products from MVP to revenue-generating platforms, I understand the trade-offs between speed, quality, and maintainability.
- I prefer writing code that is explicit, testable, and extensible.
- I am comfortable mentoring engineers, conducting structured code reviews, and contributing to architectural discussions in cross-functional teams.
- I am comfortable handling high stakes situation and approaching decision making with revenue-generation in mind.

Wyrażam zgodę na przetwarzanie moich danych osobowych dla potrzeb niezbędnych do realizacji procesu rekrutacji (zgodnie z ustawą z dnia 10 maja 2018 roku o ochronie danych osobowych (Dz. Ustaw z 2018, poz. 1000) oraz zgodnie z Rozporządzeniem Parlamentu Europejskiego i Rady (UE) 2016/679 z dnia 27 kwietnia 2016 r. w sprawie ochrony osób fizycznych w związku z przetwarzaniem danych osobowych i w sprawie swobodnego przepływu takich danych oraz uchylenia dyrektywy 95/46/WE (RODO).

MAR 2020
- MAR
2021

- Delivered cloud-native solutions on Google Cloud and Microsoft Azure.
- Improved performance and reliability of legacy systems through refactoring and architecture redesign.
- Managed technical communication with clients and translated business requirements into production systems.

.NET Engineer

LaserSoft, (Italy)

- Developed full-stack applications using React, Node.js, and .NET.
- Built chatbot solutions for retail and hospitality clients using AI APIs and custom dashboards.
- Migrated legacy systems to Azure cloud services to improve stability and maintainability.
- Contributed to React frontend development and Node.js backend automation tools.
- Developed bots and crawlers for data processing tasks.

OCT 2019
- MAR
2020

Software Developer - Stage

Link1 Studios, (United Kingdom)

- Contributed to Angular components development
- Worked on globalisation of legacy SaaS
- HTML scraping via Python.

Certifications

2024

Google Cloud Developer

2023

Angular Training – Angular Developer Certificate

2023

AI/ML Bootcamp – Zero To Mastery (2023). - ONLINE

2019

VR Technologies & Unity – Canterbury Christ Church University
